

Prit Kumar

Open-Source Developer · Privacy Advocate

Bihar, India

✉ pritform@gmail.com  pritr  Prit Kumar

Summary

Open-source developer and B.Tech CSE student building software that respects privacy and freedom. Maintainer of **Predict** (Manifest V3 browser extension with **270+** ★ on GitHub) redirecting 30 surveilled platforms to privacy-friendly frontends, published on Chrome, Firefox, and Edge. Lead of tech & programs at **Bodhya** FOSS community (aligned with FOSS United / Samagata) bringing tech opportunities, mentorship, and workshops to engineering students in Bihar.

Projects

Predict — Privacy Browser Extension

github.com/pritr/predict

Maintainer & Lead Developer (270+ ★ on GitHub · GPL-3.0)

Nov 2023 - Present

- Manifest V3 browser extension redirecting 30 tracked sites (YouTube, X, Reddit, Google, Instagram, TikTok) to privacy-friendly frontends (Piped, Nitter, Redlib, SearXNG, etc.).
- Minimal-permission architecture published on Chrome Web Store, Firefox Add-ons (incl. Android), and Microsoft Edge.
- Automated instance health checking and sync workflows maintained via GitHub Actions ([pritr/instances](https://github.com/pritr/instances)).

JanSahay — Welfare Scheme Eligibility Platform

jansahay.pages.dev

Built with Team Tejas at TEJAS India Hackathon 2026 (GEC Sheikhpura)

Sep 2026

- JanSahay exists because people were quietly losing benefits they were already eligible for — Bihar's welfare schemes are scattered across PDFs and barely-usable portals, so I built a Hindi-first app where you register once and it instantly tells you which schemes you qualify for.
- Designed around my own users in rural Bihar: offline-first so it works without data, 48px touch targets, and Hindi TTS that reads scheme details aloud for people who struggle with text.
- Added a Hindi chat assistant that refuses to hallucinate — a deterministic rule engine decides eligibility, and a free LLM only rephrases the reply; no AI ever makes the call on who gets a benefit.
- Consent-first by design: a local sahayak (helper) verifies and syncs a person's profile via OTP, and deadline alerts warn people before a scheme window closes — not after.
- Under the hood it's a TypeScript monorepo shared between a React PWA and an Android app, deployed as a Cloudflare Worker and live at jansahay.pages.dev.

BEU Connect — Academic Utility Portal

beu.prit.eu.org

Creator & Lead Developer

2024 - Present

- Centralized portal bundling syllabus, exam results, result analytics, and official alerts for Bihar Engineering University colleges.
- Scraped and parsed PYQ (past-year question) papers from scattered unofficial sites into a structured, searchable archive.
- Digitized scanned question papers using OCR and Vision-Language Models (VLMs).
- Built a bulk ingestion pipeline dumping result data for all BEU students into a queryable database powering result analytics.
- Optimized frontend architecture ensuring rapid mobile load times and seamless navigation for thousands of BEU engineering students.

chaind-cli — Sovereign AI Agent Daemon

github.com/fossism/chaind-cli

Lead Developer

2024 - Present

- Headless Go daemon bridging messaging apps (WhatsApp, Matrix, Telegram) directly to local AI agents via permission-gated Unix sockets.
- Designed for secure, zero-cloud interaction with self-hosted LLMs without exposing open network ports.

listbrew — Contact Sync Engine

github.com/pritr/listbrew

Creator & Maintainer

Dec 2025 - Present

- Real-time contact synchronization engine written in Python for Frappe to sync contacts directly into Listmonk.
- Shipped with full automated CI/CD quality gates using Ruff, Semgrep, ESLint, PyUpgrade, and pip-audit.

Experience & Community

Bodhya FOSS Community

bodhya.net — Bihar, India

- Tech & Programs Lead — Founding Core Team
- Jan 2026 - Present
- Lead tech and programs for a FOSS community aligned with FOSS United & Samagata linking tier-2/3 college students with open-source mentors, workshops, internships, and real projects.
 - Built production tooling including automated certificate generators, event portals, and Frappe/Listmonk sync integrations.

Navprayas — Student-Run Non-Profit Society

navprayas.in — Manpur Patwatoli, Gaya, Bihar

- Team Lead — Website, Database & Anchoring
- May 2025 - Present
- Team lead for website, database, and anchoring at Navprayas — a student-run non-profit (est. 2000) driving education and development for the Manpur–Patwatoli society in Gaya, Bihar (15K+ participants, 700+ alumni).
 - Drove the org’s first online registration transition, integrating Razorpay payment gateway, for MTSE (Manpur Talent Search Exam, classes V–X) and other events.
 - Handled issues faced by school students and their parents using the new online forms for the first time — providing end-to-end support.
 - Anchored annual felicitation ceremonies including Pratibha Milan.

FOSS Club GEC Sheikhpura (FOSS United)

fossunited.org/c/gec-sheikhpura

- Core Team Member
- Aug 2025 - Present
- Core team member of Bihar’s first FOSS United college club — organizing Git/GitHub workshops, Linux installation parties, and GSoC career conferences.
 - Arch Linux advocate; converted 15 student machines to Linux environments and terminal workflows.

Technical Skills

Languages	Python, TypeScript, JavaScript, Go, C, C++, Bash, SQL
Web & Stack	React, Astro, Tailwind CSS, HTML/CSS, REST APIs, Node.js
Tools & Systems	Git/GitHub, GitHub Actions, Linux (Arch), Docker, Nginx, PostgreSQL, Supabase, Frappe
Data & Automation	Web Scraping & Parsing, OCR & Vision-Language Models, ETL Pipelines, CI/CD
Agentic AI	OpenCode, Claude Code, AI Agent Workflows, LLM-Assisted Development
Focus Areas	Privacy Tech, FOSS, Self-Hosting, Community Building

Education

Government Engineering College (GEC), Sheikhpura

Sheikhpura, Bihar, India

B.Tech in Computer Science & Engineering — Bihar Engineering University (BEU)

2024 - 2028
